Ref	APPDEV
Start date	ASAP
Salary	Competitive basic, plus up to 20% bonus, private healthcare, 25 days holiday, 5% contributory pension.
Career stage	F/G Depending upon experience
Department	IT
Location	Nottingham, UK
Reporting to	Development Lead
Purpose of role	At TDX Group our Technologists focus on technological excellence, superb delivery and offer up collaboration with all areas of the business. Our Developers work as part of a development team, liaising closely with the wider IT department to understand our products and applications. Your primary responsibility is to deliver ASP.NET web applications using Visual studio written in C#/VB.Net and SQL Server, and to maintain and upgrade existing solutions.
Business impact	Our IT Department has a strategic partnership with the business which makes it an integral and visible part of TDX Group. Your role within this team will be to ensure that best practice methods are upheld in order to deliver high quality results to the organisation.
Role dimensions	Reporting into the Development Lead your day to day responsibilities will involve interaction with colleagues across IT and the wider business. You will work in a team of 4-6 individuals within the Design & Development Team.
Key objectives	<p>Your core responsibilities will include:</p> <ol style="list-style-type: none"> 1. Undertaking software development, translating requirements from both customers and colleagues into robust solutions following either a traditional software engineering or Agile development approach 2. Providing technical expertise in the support of existing business solutions 3. Supporting the definition of the technical architecture for TDX products 4. Designing and building new products 5. Investigating and resolving faults identified within existing software 6. Supporting the quality assurance and testing phases of delivery 7. Working with and enhancing development tools, techniques and standards 8. Interfacing with customers, the IT Operations and Service Management teams, and project teams in managing the testing and implementation of development work 9. Maintaining knowledge of software development products and methods, and communicating this within the team 10. Building and maintaining the IT Knowledgebase repository.

Communications and work relationships	<p>Internally this role communicates with IT colleagues, Operations Specialists, business line heads and other key stakeholders in relation to providing a robust application infrastructure.</p> <p>Externally the role communicates with our hosting partner in resolving application infrastructure issues and/or provisioning new services.</p>
Skills and experience	<p>Essential</p> <ul style="list-style-type: none"> • Proven ability to create ASP.Net and C# web applications • Understanding of SQL/ MSSQL Server 2005/2008 • Understanding of Object Orientated Programming • Understanding of Web Services/WCF • Adaptable and results oriented – puts top priority on getting results • Ability to translate user requirement into a working solution • Ability to document work in a clear and concise manner • A self-motivated and driven individual exhibiting a confident and mature style • Able to work independently and as part of a team <p>Desirable</p> <ul style="list-style-type: none"> • SQL Server Integration Services • Previous experience working in a commercial environment • Latest Microsoft technologies such as Razor, XAML etc
