

Web Developer

Ref	WEBDEV
Start date	ASAP
Salary	Competitive basic, plus up to 20% bonus, private healthcare, 25 days holiday, 5% contributory pension.
Career stage	G/H Dependent upon experience
Department	IT
Location	Nottingham, UK
Reporting to	Development Lead
Purpose of role	At TDX Group our Technologists focus on technological excellence, superb delivery and offer up collaboration with all areas of the business. Our Developers work as part of a development team, liaising closely with the wider IT department to understand our products and applications. Your primary responsibility is to design and implement user interfaces for asp.net web pages in visual studio using HTML, JavaScript and JQuery.
Business impact	Our IT Department has a strategic partnership with the business which makes it an integral and visible part of TDX Group. Your role within this team will be to ensure that customers get the best experience using our products and that they are visually impressive to demonstrate.
Role dimensions	Reporting into the Development Lead your day to day responsibilities will involve interaction with colleagues across IT and the wider business. You will work in a team of 4-6 individuals within the Design & Development Team.
Key objectives	<p>Your core responsibilities will include:</p> <ol style="list-style-type: none"> 1. Undertaking software development, translating requirements from both customers and team members into robust solutions following either a traditional software engineering or Agile development approach 2. Upgrading the user interface on existing products 3. Designing and building new products 4. Supporting the quality assurance and testing phases of delivery 5. Interfacing with customers, the IT Operations and Service Management teams, and project teams in managing the testing and implementation of development work 6. Maintaining knowledge of software development products and methods, and communicating this within the team 7. Building and maintaining the IT Knowledgebase repository.
Communications and work relationships	Internally this role communicates with IT colleagues and users in relation to providing rich and robust UIs on all our solutions.
